

Evaluator

AI-native contract lifecycle management *for enterprises.*

Built for Legal, Procurement, Finance, and Operations leaders managing the post-signature value zone.

BRIEFING

Platform & capabilities

PREPARED

2026

FROM

Rotterdam, NL

Nine agents. One model. *Every contract.*

Six built-in capabilities. None of them an add-on. None sold separately.

9

SPECIALISED AI AGENTS

30+

CLAUSE TYPES EXTRACTED

10

RISK DIMENSIONS SCORED

13

SLA METRIC TYPES

01

Contract Intelligence

Metadata, 30+ clause types, 10 risk categories, semantic search.

02

Obligation Tracking

RAG status, owner assignment, escalation, evidence.

03

SLA Monitoring

Breach detection, automated improvement plans, vendor scorecards.

04

Renewal Management

Auto-renewal detection, notice tracking, AI recommendations.

05

Relationship Governance

Perception gap analysis, composite health, improvement points.

ONLY IN EVALUATOR

06

Enterprise Security

Encryption, RBAC, multi-tenant isolation, audit trails.

Four disciplines, *examined in turn.*

What each one does, what it extracts, and what it produces — built in, not bolted on.

01

Obligation Tracking

Every promise — tracked, owned, evidenced.

- Classification across 7 types (delivery, reporting, payment...)
- RAG status dashboard, owner assignment, escalation paths
- Configurable deadline alerts to email · Slack · Teams
- Evidence attachments, compliance reporting, audit-ready trail

02

Risk Detection

What is buried in the boilerplate.

- 10 risk categories: indemnity, liability, IP, termination...
- 4-level severity scoring (Low / Med / High / Critical)
- Knowledge-graph anomaly detection vs portfolio norms
- Portfolio risk dashboard with drill-down by vendor and type

03

SLA Monitoring

Recover what you are owed — automatically.

- 13 SLA metric types: uptime, response, resolution, throughput...
- Real-time breach detection across the vendor base
- Automated service-credit calculation per contract terms
- A-to-F vendor scorecards: compliance · breaches · impact

04

Relationship Governance EXCLUSIVE

The view from both sides of the table.

- Perception-gap analysis: how you see them vs they see you
- Composite health: Risk 30% · SLA 40% · Obligations 30%
- Auto-generated improvement points with owners and priorities
- Multi-party satisfaction surveys, KPI tracking by relationship

Connected. Inspectable. *Built for enterprise.*

Reads operational reality. Traces every AI decision. Designed multi-tenant from day one.

INTEGRATION SCOPE		AI-NATIVE ARCHITECTURE		ENTERPRISE SECURITY	
Read the world		Inspectable AI		By default	
Compare contracted terms against the systems where the work happens.		Nine agents in parallel, traced and replayable. Defensible for risk teams.		Multi-tenant isolation at the data layer. GDPR-aware. EU residency available.	
ServiceNow ITSM	Shipping	Specialised AI agents	9 native	Multi-tenant isolation	Data layer
ERP volumes (SAP · Oracle)	Per engagement	Knowledge graph anomalies	Built-in	Role-based access control	API layer
FX rates (ECB feeds)	Per engagement	Langfuse observability	Per call	Encryption at rest & transit	Standard
SharePoint document store	Shipping	Human-in-the-loop	Shipping	Full audit trail	Every action
REST API + webhooks	All endpoints	Source-clause citation	Every flag	Residency	Available
				SOC 2 · ISO 27001	Roadmap

What the legacy CLM tools *do not do*.

Evaluetor was built model-first. The difference is visible in the cells of this table.

CAPABILITY	Evaluetor	DOCUSIGN CLM	ICERTIS	IRONCLAD
Native AI agents	Nine	Limited	Add-on	Limited
SLA monitoring	Built-in	Not standard	Add-on	Not standard
Obligation tracking	AI-extracted	Manual	Manual	Limited
Relationship governance	Built-in	Not standard	Not standard	Not standard
Knowledge graph	Built-in	Not standard	Not standard	Not standard
LLM observability	Langfuse	Not standard	Not standard	Not standard
Unlimited users	Yes	Per-seat	Per-seat	Per-seat
Time to first outcome	Within weeks	6–12 months	12–18 months	3–6 months

Comparison reflects publicly documented capabilities at time of writing (May 2026). Vendor packaging and tiering vary; "Not standard" indicates not part of the default offering.

Thank you. *For your time.*
